

Bachelor of Science

Health and Wellness Innovation in Healthcare

College of Nursing

Given the constant changes in the healthcare industry, there is a large need for new, innovative and sustainable models of health promotion. The Health and Wellness Innovation in Healthcare major was designed to address this revolution. Our program prepares students to support health and wellness across the lifespan, in all states of health as a health promotion professional. The curriculum includes core courses in health literacy, the dimensions of wellness, health program planning and more. All students will participate in a hands-on practicum experience at progressive and innovative organizations and businesses. This experience will prepare them for a career in health promotion.
